

# Assistive Devices for Loan

---

*From the State ADA Coordinator's Office*

## ***Pocketalker***

**Pocketalker is a portable device that works by amplifying sound picked up through a microphone and sending it straight to ear buds.**

## ***UbiDuo***

**UbiDuo is a portable, wireless, battery-powered, stand-alone communication device that facilitates simultaneous face to face communication by means of two displays and two keyboards.**

## *FM Listening System*

**FM Listening system is a portable wireless listening system. In a public setting a speaker may wear a microphone and transmitter that sends his or her voice to a receiver equipped with earphones or a neck loop that works with participants' hearing aids. This device is equipped with 20 receivers and is suitable for large conferences.**
